FOREWORD

In the world today there is much unrest. Great steps have been taken to preserve the word peace, but not much progress has been made in that direction. One nation and a great bomb have caused the wheels of peace to run rather uncertainly.

World War II was fought to free the world from wars, but nations do not seem to be able to live together peacefully. "Learn to Live, Live to learn," the motto of the class of 1948, is something that if practiced could change the conditions of the world.

As we, the Class of 1948, leave our work in attaining an education to face the world, we cannot see far into the future. But, whatever confronts us, we will strive to make an honest showing of great faith and courage in defending or extending Democracy.

With this book, *The Parnellian*, we bring to a close our working together as a class. We leave our Alma Mater to take our places in society and in the world of today, to "Learn to live, Live to Learn."

RAYMOND HAWBAKER,
Editor.

Dedication

We, the Class of '48, dedicate this issue of THE PARNELLIAN to the memory of Betty Florence Rosenberg, who died while in her junior year at Lemasters High School.

Betty was born March 15, 1929, and started to high school with the Class of '48. She died November 21, 1946.

We will always remember her cheerfulness and ability to get along with people.

Principal's Message

GRADUATION AND CONTINUED EDUCATION

When a high school senior recalls the rapid progress he made in the succeeding stages of his development, from a dependent child to a self-reliant youth, he is conscious of the significant word "change." Change characterizes life just as it affects society. Change is brought about in peoples' lives not only through growth and development, but also through education, and education is a life-long process.

When the graduate leaves his textbooks, at the completion of his high school course, and closes the doors of his high school behind him, he may breathe a sigh of relief, but he does not get away from education. Life is continuous. Life is subject to constant changes. As youth faces this new phase of life, outside of high school, without the kindly guidance and counsel of his teachers, there is much he will have to learn through the inefficient method of trial-and-error. Frequently he will miss the steadying hand of a mature friend. Far too often he will find his own oars weak and ineffective against the strong and masterful currents of life. He may look longingly back towards the safety and security of the harbor, but his course lies ahead. Now he is on his own. Whatever regrets he may experience are useless. Lost moments and lost opportunities are beyond recall.

As youth looks ahead he need not despair. When problems that seem almost insurmountable confront him, he may still find their solutions in books. Librarians will gladly furnish these books simply for the asking. What will be lacking will be the teacher's tests. Life will be the teacher, and life will provide the tests. Success or failure of the learner will, naturally, depend on his industry, aspirations, and initiative.

The harvest can be no better than the seed that is planted. Toil and sweat will not produce where soil and cultivation are poor and inadequate. Intelligent husbanding of strength and resources needs, obviously, to be supplemented by considerable intelligent planning. Continued education will help the planter who hopes to reap a rich harvest.

On the farm it is not the loss of a single crop that ruins, necessarily, but the washing away of the top soil is a permanent loss. Likewise in life, moral and mental erosion are more hazardous than loss due to error. Education should help one to weather the vicissitudes of off-years. It should furnish an intellectual and spiritual basis for the fruitful living of a full life. Frustration should not be the child of an intelligent mind, for man is spiritually bigger than the physical world that often tends to engulf him. An enriched life demands an education for living.

True, teachers cannot go through life thinking for their former students. Only the impact of their personalities and of their teaching on the students, thought and action, will be effective in their future living. Self-discipline and self-direction are the essential characteristics of a mature life. Education for a changing life will, perhaps, be the chief concern of all who will be called upon to meet the world's challenges. How well a graduate of Lemasters High School will succeed will depend largely on how he learns to live effectively and happily from day to day. Continuous education will aid in this enterprise of happy living. Therefore, it will be helpful for graduates to continue their education.

CLASS SONG

Alma Mater tried and true
Our fondest hopes do turn to you.
For now our time has come to leave
Which causes each of us to grieve.
Although we've struggled to get through
Our school days now seem too few.
And happy shall remain
To prove our school years weren't in vain.

As twenty-six we shall leave here
Our dreams are bright; we have no fear
We seek a future free from strife
Where we may have a useful life.
May God grant us the strength we need
To do our best and to succeed
Dear Alma Mater tried and true
Our fondest hopes do turn to you.

Senior Class Prophecy

One beautiful evening my best girl friend, Wanda Hull, and I decided to take a ride to pass the time away. She is better known as Mrs. Harry Benedict. Her husband is a teacher of mathematics at the Mercersburg Academy, but he was at home taking care of their three little boys tonight.

It was such a beautiful evening that I thought of romance and this brought June and Harry to my mind. They were always such lovebirds. They are now married and very happy. At present they are living in New York where June is an actress on Broadway and Harry has taken good advantage of his training in the office and is a successful business man.

Wanda and I then decided to go to see a movie in Chambersburg. We purchased our tickets and were thoroughly amazed to find Frances Robison in the box office. She said that she wanted us to meet her boss, which seemed strange to us. To our overwhelming astonishment, she brought Harold Frye over to us. We chatted for a few minutes and discovered that the theatre was just a sideline for "Red" as his specialty was operating a dancing school. He then politely ushered us to our seats.

During the intermission between the shows, there was a prelude of music by a well-known orchestra and when their star vocalist came out, he was none other than Jack Hill. I always knew that he would get somewhere with that voice of his. The lady next to me said that he was soon going to Chicago with the orchestra. I wish him luck. I remember that he helped a great deal as a goal keeper to win the soccer cup way back in 1946-47.

The movie then began and, since it was a comedy, there were plenty of laughs. I heard two in the audience that sounded familiar—one that squeaked every now and then and I knew that it could be no other than Milton Barnes and the other was that of jolly Wilma Keyser.

After the show was ended, I cornered them and inquired how they were. Wilma informed me that she owns and operates her own florist shop. She told me that Helen Auman and Betty Lamaster came in the other day and that it was the second time she has seen them since graduation.

Helen and her heart-throb are happily married and have a little Barbara and Garry. Betty, who was always Helen's best friend, is married to a Wyoming cowboy and together they own a horse ranch. Betty always loved horses as well as human beings.

Betty had told Wilma that Dick and Don Hopkins are star baseball players and are both married. Of course she would know because they were all in the Markes Gang.

Finally Milton was able to get a word in edgewise in the conversation and I found out that he is studying to be a portrait painter. He was always drawing some kind of picture when he was in high school. He is still a bachelor but his high school pal, Raymond, is married and has his own farm.

On our way home we stopped at the confectionery for a coke and collided in the doorway with Mr. and Mrs. William Gingrich, Mrs. Gingrich being the former Mary Lou Schenck. She laughed when I told her that I couldn't imagine her as a settled housewife because she was always so active and had such a flirtatious manner. They couldn't stay any longer because Joyce and her hubby were waiting for them in the car. She didn't tell the name of Joy's husband, but she said they call their son, John Malone, Jr.

Going the rest of the way home, Wanda and I thought about our old school days and classmates at L. H. S. It was fascinating because things had changed so since then. We are now living in the atomic and helicopter age and the students now travel to school in their own private helicopter. Although all this has happened, my classmates have not entirely changed.

Nathan Heckman has married his girl friend and is now farming.

"Mike" Riley, one of the best players in all sports, is still playing soccer and baseball. He has organized his own team called "Riley's Riot Players" and I hear that they haven't lost a game so far.

Glenn Barnes has become a teacher and the female students really swoon over those blonde waves in his hair. He is also the coach of the school's ball team. The boys of our class were real athletes.

Eugene Hull is an air mail pilot with a run between New York and Paris. I remember when he used to work at the Fort Loudon Post Office.

Pauline Beatty is married and lives in Mercersburg. The only profession that interests her is being a good housewife.

Roberta Hamil has also married, but she has a career, too. She is a hat model and I'll bet she makes a cute one with that beautiful dark hair.

Helen Cuff is engaged. At present she is working in a department store in Baltimore.

Doris Reeder is a secretary in a bank and very much devoted to her work.

Nellie Keefer is a mathematics teacher at Lemasters High School.

And, last but not least of my classmates, is the petite Evelyn Benedick. She has achieved her greatest ambition, that of a housewife and nurse. She is married to a doctor from North Carolina.

I was happy as I went to bed that night because my classmates have been so successful and I decided that as soon as possible I would have an Alumni Party for the class of 1948, just for old times sake.

Class Poem

On September of Nineteen Forty-four,
 The school doors opened wide once more,
 And forty-six Freshmen entered in
 Their four years of High School to begin.

We studied hard to make the grade,
 But feel ourselves highly repaid,
 When looking back along the way
 Our thoughts to happy moments stray.

To the many teachers we've met here,
 Both those serene and those severe,
 We express our gratitude for their ambitions
 And efforts to make us better citizens.

Our hopes for a world peaceful and strong,
 Will be our guide as we go along,
 And may our dreams continue bright,
 And freedom always remain our right.

Only twenty-six remain as the time draws nigh,
 Our school days have passed quickly by,
 To our Alma Mater, our thoughts will often turn,
 But we must "Learn to live, and live to learn."

This is the third year here at L. H. S. for the Class of '49. Since they first started to high school, they have lost quite a few of their classmates. They learned, much to their chagrin that they would occupy the room vacated by the Class of '48, the stage. Their ire was elevated to a rather high pitch when they discovered that they would have to move from their room quite frequently. They also acquired a new teacher this year, Mrs. Barbara Stroup.
